CUSTOM ILLUSTRATIONS

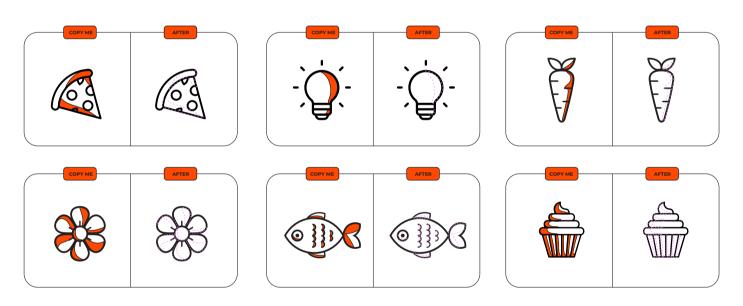

Exercise one:

To improve your skills of creating custom illustrations complete the exercise below. Just use the pencil tool to draw over the grey illustration. Follow the pink guide.

Exercise two:

Now it's time to add some depth into to the shapes created. Just follow the pink guide to draw a shape then fill it with a solid colour. For this exercise make sure you're working in the 'add highlights' layer (as this layer needs to be behind the outlined object).

Exercise three:

Drawing from your memory can be hard which is why using a reference image can be handy! With the 3 images provided below use the pencil tool to draw the object. You can even add some highlights just like you learnt in exercise two.
